-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Response to Amendment

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "122" has been used to designate both electric lift mechanism and motor (see disclosure page 13, line 18), additionally reference character "120" has been used to designate both wheel lock (see figure 2) and unidentified shape (see figure 18). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claim 5 is objected to because of the following informalities: It is unclear whether the "tilt mechanism" (see claim (1)c(iii)) and "lift mechanism" (see claim 5) are one in the same since the electric lift mechanism is defined by reference character "122" in the disclosure. Clarification is required.

Conclusion

3. Claims 1, 3-17 are allowed. The following is a statement of reasons for the indication of allowable subject matter: Though the prior art of Morgan teaches a base, support frame and independently pivotal foot rests, and Borders teaches independent foot rests and a range of motion limit detector, Berman teaches a body restraining belt, Crouch teaches an ankle pad, Borders '923 teaches a removable pad, the prior art of record fails to teach or suggest an obvious combination of the combination of the carriage mounted for slideable movement on the support frame and having a tilt mechanism to pivot the upper section relative to the lower section and the support frame pivotally mounted on a base and a center section adapted for removable attachment to a support frame between the ankle and lower section of the carriage to prevent slideable movement of the carriage along the support frame as recited in the independent claims.
